

Summit

Radial Arm Granite Polishing

Now is the time to get rid of those old fashioned bricks and save yourself time and energy. Trying to re-polish a slab of granite with your old radial arm machine bouncing and jumping all around has never been a rewarding experience.

With Summit, you can gain a fast, smooth, long lasting, factory finish on your current equipment. Say goodbye to sloppy powders and start using Summit by Alpha® today!

Metal Bond - Used for rough and medium grinding to remove coarse and uneven finishes. Very fast and even operation prepares the granite for polishing.

Resin Bond - Makes the polishing process smooth and easy. Minimizes bouncing and stone damage. Superior performance compared to old fashion polishing methods.

Final Polish - Replaces dangerous lead and felt wheels. Messy powders or mixtures are eliminated. Bring out a beautiful high gloss finish.
